

**U Invoicer** from Wise Security Global enables our customers to implement a comprehensive electronic billing system, with all the benefits of electronic invoices and respecting the current legislative framework.

U Invoicer is used both by bodies of public administration and by private companies. It is installed at the customer's premises through the purchase of a licence or in the cloud.

U Invoicer is a multi-format and multi-language solution.

## 01/ BENEFITS OF U INVOICER

- Shorten processing cycles, including of collection.
- Reduce human errors.
- Eliminate printing and postal shipping costs (with a positive effect on the environment).
- Speed up and facilitate access to stored invoices.
- Drastically reduce storage space.
- Improve customer service.
- Facilitate the fight against fraud.
- Contribute to the modernisation of the economy and the development of the Information Society, helping to positively differentiate your company.
- With a billing portal for access by suppliers where they can create electronic invoices.

Wise Security Global has developed U Invoicer to improve the efficiency of your company. In addition to saving money by removing the need for printing and sending invoices by post, this electronic support improves management in terms of **immediacy and security**.

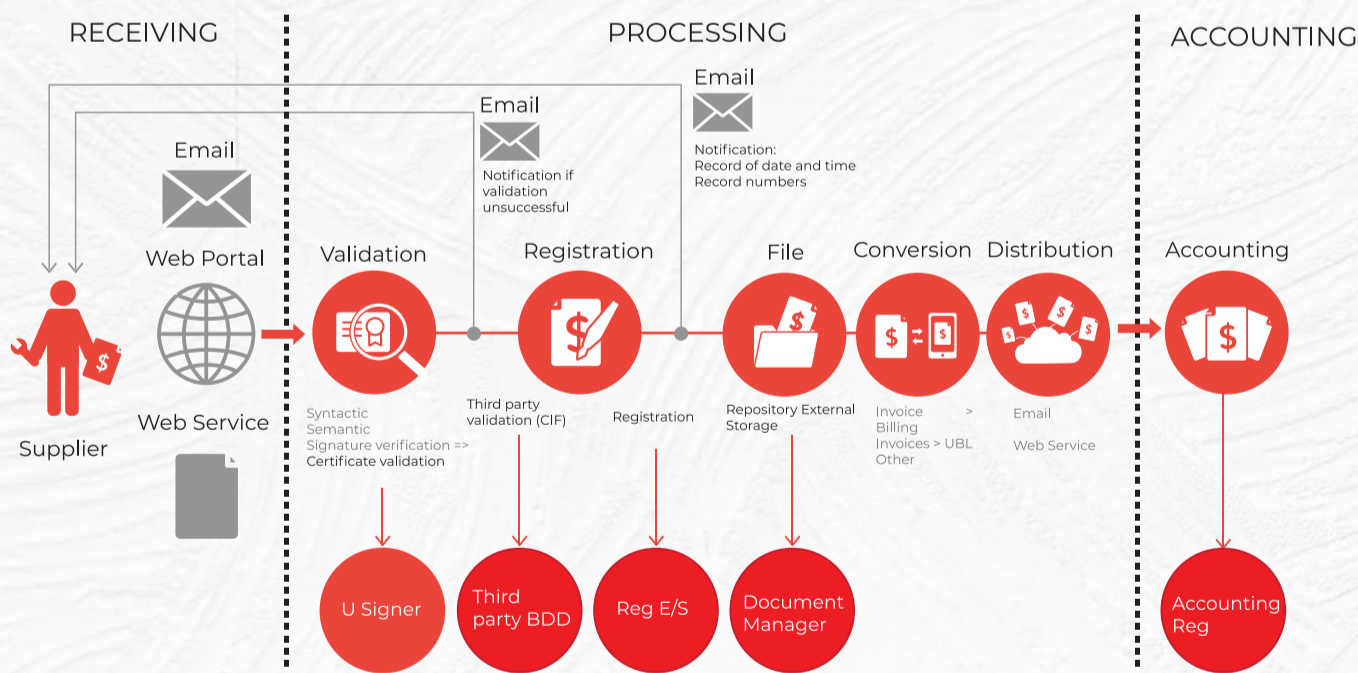

Increase your brand reputation and CSR plan by adapting your systems to new technologies and reducing your company's environmental impact.

Any company can implement the **issuing** of electronic invoices to its customers with U Invoicer. It is also a centralised service for **receiving** electronic invoices from suppliers.

While receiving and issuing invoices are the main modalities on which our electronic invoice platform is built, we also offer the possibility of customisation so that the platform can be implemented in different scenarios, including:

- Self-billing
- Brokerage
- Sub-billing
