# WHAT IS HAUNT KEEPER?

**Haunt Keeper** is a small Wi-Fi device designed and configured by **Wise Security Global**. After connecting to the home network, it works by creating a new and secure "work" Wi-Fi network. Setting up the device on the home network is simple and transparent.

## Make your remote working secure with Haunt Keeper

- Prevents cybersecurity issues such as information leaks or ransomware.
- Increases the brand's reputation and confidence.

# HOW DOES IT WORK?

Once connected, the user will work on a secure network that incorporates all the security measures typical of a corporate network, along with other utilities such as VPN connectivity, firewalling, intrusion detection, content filtering, etc.

The rest of the home's devices will maintain their usual Internet connectivity via the home network, which will continue to operate in parallel, but isolated from the secure network generated by **Haunt Keeper**.

# ANTIVIRUS DOESN'T PROTECT YOUR WIFI

**Haunt Keeper covers security that does not reach the antivirus.** While an antivirus analyzes the endpoint and anomaly behaviors of devices, Haunt Keeper scans the network and infrastructure. Another difference is that the antivirus acts on the device on which it is installed (individually), while Haunt Keeper protects an entire network of working devices.

# VPN DOESN'T PROTECT YOUR WIFI

**VPN does not act outside your corporate site,** it does not protect when you browse the Internet freely. THE VPN encrypts information between a device (endpoint) and the corporate network, but does not operate on the local network. If you have VPN but don't have WiFi control, by the time you connect to the VPN you've already been exposed to threats coming through WiFi.

## Haunt Keeper makes it easy

- ✓ Haunt Keeper is a genuine plug&play device and requires no prior set-up
- ✓ No additional hardware required.
- ✓ 24/7 support and maintenance.
- ✓ It uses MEE The Cyber Notary technology (solución de Wise Security Global para to **certificated authenticity of users sent notifications.**
- ✓ Data privacy guaranteed.

# HAUNT KEEPER CONECT AND GO

## Easy installation

Setting up Haunt Keeper is quite simple.

- All you have to do is connect your device to the router and to the electrical current
- You turn it on and a remote automatic configuration process starts
- When you connect to the network you will receive a welcome SMS and an Email with the credentials to connect (through MEE \*).
- Once connected, link your work devices to the WiFi network generated by Haunt Keeper

### Once Haunt Keeper has been connected to the network

- ✓ Work devices connecting to a secure and safe WiFi network.
- ✓ Monitoring in search of abnormal behaviour.
- ✓ 24/7 support and maintenance by Wise Security (updates, etc.).
- ✓ Regular password rotation.
- ✓ Extra functionalities according to service model (VPN, URL filtering, etc.).

MEE, The Cyber Notary, is a Wise Security Global solution that performs any type of certified notification with different security layers, including Blockchain (the first solution on the market to use Blockchain-based security layer). In addition, it signs electronic documents and adds temporary stamps for each change of status that occurs during the sending process, leaving evidence of all the steps in said process.

# DATA PROTECTION GUARANTEE

Wise Security guarantees that all personal data belonging to customers to which it has access during the execution of professional services will be used for the sole purpose established in the contract between the customer and Wise Security Global.

Wise Security Global undertakes to comply with the requirements established by REGULATION (EU) 2016/679 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 27 April 2016 on the protection of individuals with regard to the processing of personal data and the free movement of such data, as well as its adaptation to Spanish Law 3/2018 of 5 December, "Protection of Personal Data and Guarantee of Digital Rights". In particular, it agrees to:

- Process personal data only under documented instructions from the data controller, including when transferring personal data to a third country or an international organisation;
- Ensure that persons authorised to process personal data have pledged to maintain confidentiality or have an adequate legal obligation of confidentiality;
- Adopt all necessary measures in accordance with article 32 of the GDPR;
- Help the data controller to ensure compliance with the obligations set out in Articles 32 to 36 (GDPR), taking into account the nature of the processing and the information available to the data processor;
- Provide the customer with all the information necessary to demonstrate compliance with their obligations and to allow and contribute to audits, including inspections, carried out by the customer or by another auditor hired by the customer.

**GENERAL INFORMATION  
WISE SECURITY GLOBAL**

# SOBRE WISE SECURITY GLOBAL

- Wise Security Global is a technology company offering services and solutions to uphold the trust and security of our customers in the cyberspace.

Our accumulated high-performance experience, alongside expertise, knowledge and talent, have enabled us to become one of the leading brands when it comes to cybersecurity, certification and signatures worldwide.

<https://wsg127.com/>

## TALENT

80 PROFESSIONAL EXPERTS WITH EXPERIENCE AND KNOWLEDGE IN THEIR SECTOR

## PARTNERS

NETWORK OF PARTNERS INTERNATIONALLY WITH FIRST-CLASS SERVICE

## CLIENTS

MORE THAN 100 CUSTOMERS MAINLY IN PUBLIC, FINANCIAL, INDUSTRIAL, HEALTH, ACADEMIC AND SECURITY CENTRES SECTORS

## TOP START UP 2020 LinkedIn Spain

Wise Security Global has been recognized by LinkedIn as one of the 10 most promising emerging companies in 2020.

# SOLUTIONS AND SERVICES

## CyberTRUST division

Our technology division specialising in solutions that demonstrate the digital evidence of any transaction, operation or action that occurs between two parties in the online world. We are experts in developing technology to respond to all the contexts in which electronic evidence is required, with full legal validity anytime and anywhere.

We incorporate BLOCKCHAIN technology into our electronic signature and certification solutions as an additional layer of security, and we are recognised and authorised as a Trusted Third Party by the Ministry of Industry, Tourism and Trade of the Government of Spain (Article 25 of the LSSICE).

## Featured solutions

### MEE

The 100% Trust technology solution for notifications, electronic signature and legal certification on Blockchain. Mee, The Cyber Notary, uses a Blockchain-based security layer. In addition, it signs electronic documents and adds temporary stamps for each change of status that occurs during the sending process, leaving evidence of all the steps in said process.

### BLOCKCHAIN STAMPER

Blockchain Stamper generates a certified copy on a Smart Contract and records all actions carried out against this contract by serializing them in a single document. It also indexes the most relevant metadata of these transactions and displays them on the signed and electronically certified copy.

**BLOCKCHAIN**  
**STAMPER**

# SOLUTIONS AND SERVICES

## CyberSECURITY division

Especialización en **hacking ético, ciberseguridad gestionada y el modelo CISOaaS**, monitorizamos los sistemas y entornos online de nuestros clientes, y disuadimos posibles ataques mientras construimos ciberentornos estables.

Desde nuestro **CSOC** ofrecemos a cualquier organización pública o privada, una solución integral y adaptable, que abarque todos los aspectos tecnológicos, legales y organizativos en materia de ciberseguridad.

## Featured solutions

### NET ALARM

One of the cyberSecurity products/solutions that offers cyber protection for companies. Net Alarm detects cyber incidents, acts as a remote incident response support tool, handles external network surveillance and offers support at facilities. Thanks to its R&D systems, it is able to engage strong detection using algorithms for the most complex cyber attacks.

[wisenetalarm.com](http://wisenetalarm.com)

### CISOaaS

CISOaaS is a service aimed at companies that need to implement a robust and reliable cybersecurity model and do not have a professional CISO profile in the business structure.
